Continuation of 11. does NOT place the application in condition for allowance because: In response to applicant's argument 'A'; based on 35 U.S.C. 103 (a) the fact that the cited reference was not published in time is irrelevant, the examiner maintains in view of the statutory regulations the rejection is proper.

In response to applicant's argument 'B'; the Benson reference was used to teach connecting a smart card reader through a phone's existing SIM slot, which in fact it does teach (Column 6, Lines 3-18; Benson), no reliance was placed on Benson to teach the contactless aspect as the examiner has relied on the Fox reference to teach this aspect.

In response to applicant's argument 'C'; the Fox reference does in fact teach a contactless smart card 'reader' in a wireless setting. Fox discloses that technology embedded in the cellular phone has the ability to "update/change [read/write] information stored within the smartcard by utilizing the cellular telephone functions to electronically communicate with an external system" (Column 2, Lines 26-29; Fox). That is to say that the piece of memory commonly refereed to as a 'smartcard' housed in Fox's cellular phone has the ability to read information from said smartcard housed within. The examiner has construed this construction as a capable of being read in the broadest possible interpretation as a 'smart card reader' furthermore as Fox teaches this process being achieved in that no contact is necessary (Column 2, Lines 18-21; Fox) it is in fact a contactless smart card reader.

In response to applicant's argument 'D'; the examiner maintains that Benson disclosing that "ensur[ing] that a subscriber has an arrangement to effect payment for the services provided" (Column 4, Lines 58-60; Benson) does in fact teach using a smart card for payment. Ensuring, that is positively verifying, an arrangement that is a contract, to effect payment, to transfer monetary funds, is a means to make sure that the user has money to pay for something prior to providing that something. Nevertheless as teaching of payment via smartcard, as the applicant most likely is aware is by no means novel; as evident further in the secondary Fox reference (Column 5, Lines 1-25; Fox).

Therefore the rejection as previously set forth remains, and all claims and their dependents remain rejected...
